1. Identification

Product name: Recombinant Protein human interleukin 6

Reactions: 20 micrograms

Cat. No.: PRA-ReHIL6

2. Description

IL-6 is an important inflammatory cytokine produced by several types of cells, especially activated macrophages. This is an important innate immune cytokine against microbial infections and plays an important role in the development of humoral immunity and immune response to microbial invasions and also in the infectious shocks. The cytokine has a molecular mass each of 20.9 kilo Daltons. Recombinant human IL-6 can be intended for use in in vivo and in vitro applications. Recombinant human IL-6 is produced in E. coli BL21 transfected with the full-length sequence for the human IL-6 gene in the PET21b+.
