

## DATA SHEET

Versions: 01

Revision date: 25/11/2023

### 1. Identification

Product name: Recombinant Protein human interleukin 29

Reactions: 20 micrograms

Cat. No.: PRA-ReHIL29

### 2. Description

IL-29, which is known as interferon lambda 1, is an important inflammatory cytokine produced by several cells. This is an important cytokine to induce development of immune responses against viral infections. It also participates in the pathogenesis of autoimmune disorders. IL-29 plays controversial roles and in some cases play anti-inflammatory roles. The cytokine has a molecular mass each of 20 kilo Daltons. Recombinant human IL-29 can be intended for use in in vivo and in vitro applications. Recombinant human IL-29 is produced in E. coli BL21 transfected with the full-length sequence for the human IL-29 gene in the PET21b+.
